**EXAMPLES AND PROBLEMS  
OF THE ELECTRICAL ENGINEERING  
USING THE PC**

Kiev 2001

BBC з21я73 - 1

UDC 621.3 (076)

Z 42

Reviewers: I.I.Kovalenko - professor, D.Sc., the design office of the information systems of the Kiev National Technical University; V.L. Ivanov - Ph.D, Assistant Professor Head of the Department of Aviation Equipment of Aircraft

Zelenkov A.A., Kravchuk O.Y.

Z42 Examples and Problems of the Electrical Engineering Using the PC. K.: NAU, 2000 - p.160

The training book allows the reader to master the theory and methods of solving problems in applied electricity. The examples and problems give better insight into the theory and illustrate the application of various theoretical principles.

The training book is intended for the instructors and students of the electrical engineering specialities.

Зеленков О.А., Кравчук О.Ю.

342 Збірник задач і вправ з теоретичної електротехніки з використанням ПК: -К.: НАУ, 2001 – 160 с.

Збірник задач допомагає читачам засвоїти теорію і методи розв'язання електротехнічних задач. Приклади дозволяють глибше провидіти в теорію і ілюструють застосування різноманітних теоретичних принципів.

Збірник задач розрахований на викладачів та студентів електротехнічних спеціальностей.

## CONTENTS

PREFACE . . . . .	3
LIST OF SYMBOLS . . . . .	4
1. BASIC FORMULAS IN ELECTRIC CIRCUITS	
CALCULATION OF DIRECT AND ALTERNATING CURRENT . . . . .	5
1.1 The Direct Current Electric Circuits . . . . .	5
1.2 The Electric Alternating (Sinusoidal) current . . . . .	11
1.3 Resonance in Sinusoidal Current Circuit . . . . .	14
1.4 The Three-Phase Circuits . . . . .	15
1.5 Periodic Nonsinusoidal Currents in Electric Circuits . . . . .	16
1.6 The Nonlinear Direct Current Circuits . . . . .	17
1.7 Direct Current Excited Magnetic Circuits . . . . .	18
1.8 The Nonlinear Alternating Current Circuits . . . . .	19
2. THE DIRECT CURRENT CIRCUITS ANALYSIS . . . . .	21
2.1. Use of the Kirchoff's Law in Circuit Calculation (the Kirchoff's Laws Method) . . . . .	21
2.2. The Loop Current Method . . . . .	23
2.3. The Node Voltage Method . . . . .	31
2.4. The Circuit Transformation Method . . . . .	40
2.5. The Equivalent Generator (Active Two-Terminal Network) Method . . . . .	43
3. ALTERNATING (SINUSOIDAL) CURRENT CIRCUITS ANALYSIS . . . . .	47
3.1. Representation of Sinusoidal Quantities . . . . .	47
3.2. Analysis Sinusoidal Current Circuits by the Complex Method . . . . .	50
4. MATRIX TOPOLOGICAL ANALYSIS METHODS FOR ELECTRIC CIRCUITS . . . . .	64
4.1. The Basic Definition . . . . .	64
4.2. The Generalized Loop Current Method . . . . .	66
4.3. The Generalized Node Voltage Method . . . . .	72

5. CALCULATION OF A THREE-PHASE CIRCUIT WITH SEVERAL LOADS . . . . .	77
5.1. Calculation of a Balanced Three-Phase Circuit . . . . .	77
5.2. Calculation of an Unbalanced Three-Phase Circuit . . . . .	83
6. PERIODIC NONSINUSOIDAL CURRENTS AND VOLTAGES IN ELECTRIC CIRCUIT . . . . .	94
7. NONLINEAR DIRECT CURRENT CIRCUITS . . . . .	103
8. DIRECT CURRENT-EXCITED MAGNETIC CIRCUIT . . . . .	111
8.1. Calculation the Single-Path Magnetic Circuit . . . . .	112
8.2. Calculation the Divided Magnetic Circuit . . . . .	115
9. NONLINEAR ALTERNATING CURRENT CIRCUITS . . . . .	121
9.1. The Harmonic Linearization Method . . . . .	121
9.2. The Harmonic Balance Method . . . . .	129
10. CALCULATION OF THE TRANSIENT CURRENTS . . . . .	136
10.1. Calculation of the Transient Currents and Voltages by the Classical Method . . . . .	136
10.2. Calculation of the Transient Currents and Voltages by the Laplace Transform Method . . . . .	146
10.3. Calculation of the Transient Currents and Voltages by the Integral Duamel Method . . . . .	150
CONTENTS . . . . .	156
APPENDIX . . . . .	158
BIBLIOGRAPHY . . . . .	159
